Download the "AdventureWorks2014" database. Please do the following:

1. Restore the Database and put it into the Full Recovery Model.

2. Backup it up.

3. Run the following query:

```
Use [AdventureWorks2014]

GO

select count(*) from [Person].[Address]
```

This will tell you the number of rows in the table

4. Add an additional row to the table [Person].[Address]

5. Return the above query.

6. Wait a couple of minutes. Note the time and write it down.

7. Add another additional row, as per above. Return the above query.

8, Do a Point in Time restore, to the time that you have written down.

9. Return the above query.
